

Project Design Phase - I

Proposed Solution Template

Date	13 November 2022
Team ID	PNT2022TMID18999
Project Name	Real Time River Water Quality Monitoring And Control System
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No	Parameter	Description
1.	Problem Statement (Problem to be solved)	Often people and other living organisms are suffered due to unavailability of pure usable water. Due to this health hazards and other infections are spreaded among people. In order to secure them it is necessary to develop an system to handle the quality of water. This can also help the people to have an idea on drinkable water.
2.	Idea / Solution description	So to start this we just need to know or have an idea on the chemical composition of water or simply the nature of water. Based on timely taken analysis we can

		Find the nature of water. Use an random location on taking the amount of chemicals and impurities present in water
3.	Novelty / Uniqueness	This system developed is useful and Creates an ease of pure water consumption for natives as well as other being. People can predict the quality of water by the help of this system

4.	Social Impact / Customer Satisfaction	<p>This helps the people to save time and Energy as they can get pure river water with ease</p> <p>Building an effective system that can be create as a product for best water quality and control system.</p>
5.	Business Model (Revenue Model)	<p>Many other parts of the world and rural parts of the village are expecting this technology that can greatly facilitate the river water management system.</p>
6.	Scalability of the Solution	<p>When we predict and control the quality of water it can save people from further health damage and save people time to get purified drinking and usable river water.</p>
