Date	10 November 2022
Team ID	PNT2022TMID18999
Project name	Real Time River Water Quality Monitoring And Control System
Maximum Marks	2 marks

Solution Architecture:

Solution architecture is a complex process with many sub-processes that bridges the gap between business problems and technology solutions.

Its goals are to:

- Find the best tech solution to solve existing business problems.

- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.

- Define features, development phases, and solution requirements.

- Provide specifications according to which the solution is defined, manage and delivered.
